No. 88.—Stock Exchange Index (Sydney).

The following index of the values of the principal Company shares on Sydney Stock Exchange embraces the ordinary shares of companies (excluding banking companies) whose business is conducted wholly or largely in New South Wales.

The prices of individual shares are unweighted, and each group average is the mean of the average monthly prices per £1 of paid-up capital. The aggregate index is the average of all the shares included in the groups with the addition of 24 miscellaneous shares. There is no base period as the index represents the ratio per cent. of the average prices of ordinary shares to their par values, adjustment being made where capital is written off or bonus shares are issued.

Average for Period.	23 Manufacturing and Distributing Companies.	10 Retail Companies.	8 Public Utility Companies.	5 Pastoral and Finance Companies.	5 Insurance Companies.	Total 75 Companies.*	34 Active Shares included in foregoing.

No. 94.—Employment in New South Wales—Wage and Salary Earners in Civil Employment, Governmental and Private.

(1) Particulars in Tables 94 and 95 are estimates based on the Census of 1933 and subsequent quasi-censuses (e.g., Civilian Register, 1943, and Occupation Survey, 1945), and returns supplied monthly by governmental authorities, and since July, 1941, by employers for purposes of Commonwealth Pay-roll Tax.

(2) The number of employees recorded on Pay-roll Tax returns relates to those whose names appeared on the last pay-roll of the month irrespective of whether they were actually working at the end of the month.

(3) Working proprietors, wage earners in rural industry, females in private domestic service, members of full-time defence forces at home or abroad, National Service Trainees in camp, and Government "relief" workers are not included.

(4) Further investigation may show the need for some revision in the monthly aggregates. It is not anticipated, however, that any such revision will affect the trends shown by the figures in Table 94. Some revision will be necessary in the totals and trends in employment for individual industries (particularly manufacturing) in Table 95. Estimates of employment by various classes of factory are in process of revision.

(5) Owing to the incidence of call-ups for short periods of National Service Training since August, 1951, and to other variations in numbers of personnel in the Services, some aspects of the changes in numbers of total Civilian Employees should be considered in conjunction with changes in numbers of defence personnel who are omitted from the figures in Tables 94 and 95, viz., (i) members of the full-time defence forces and (ii) National Service Trainees in camp. Particulars of (i) are not available for New South Wales, but the number of National Service Trainees in camp in New South Wales at the end of each month since August, 1951, was as follows:—

No. 98.—Export Price Index-Numbers—Australia.

(Compiled by the Commonwealth Statistician.)

These index-numbers are compiled from the prices of 20 commodities which normally constitute about 80 per cent. of all exports. In most cases the prices used are those at which current sales are being effected. For some metals, however, the prices are the average value of current realisations in various markets and hence show some irregularity. From July, 1945, to September, 1951, the export prices used for wheat in the index were average actual realisations for current shipments. From October, 1951, the prices used are the estimated average realisations after weighting prices of quota and non-quota wheat. In this index the prices of the commodities are weighted by the average annual exports (production in the case of gold) during the three years, 1933-34 to 1935-36.

(Base of each section: Average of 3 years ended June, 1939 = 100.)

No. 99.—Wholesale Price (Basic Materials and Foodstuffs) Index-Numbers.

(Compiled by the Commonwealth Statistician.)

The price quotations in the main have been obtained directly from manufacturers and dealers, and, with a few important exceptions, from Melbourne sources. Apart from locally produced building materials and one or two minor commodities, however, the price movements may be taken as representative of fluctuations in wholesale prices of basic materials in most Australian markets. The weighting system adopted is based on average annual consumption during the years 1928-29 to 1934-35 inclusive.

From August, 1950, to 30th June, 1951, a bounty was paid on raw wool purchased for local manufacture. The effective price, that is the open market (auction room) price less bounty, has been used in calculating the index number in this table.
